

150 x 60 x 7 Spud Barge

PRODUCT DESCRIPTION

Two double rake deck barges that were joined together with assistance of naval engineering. Was built to operate with up to a 250 ton crane. Loading testing is also available if interested. The 2 barges were originally built in the 1980's. After the two barges were joined then the stern end rakes were removed, and a "Box" end was installed. The new COD shows a 2014 year which is when all this was finalized.

It has been working with a crane onboard for a while and with business demands changing the crane was removed and spud barge is available for purchase only.
