

3054T 72 kW CAT Marine GenSet

PRODUCT DESCRIPTION

Lightly used marine genset. Pulled to replace with larger generators during vessel refit. Has been in covered storage. Not only for a vessel, but with cooling modifications will make a great home, office or camp back up power supply. Included in the sale is a second identical genset. The generator is fine. The engine had developed some problem. Mechanics broke it down to repair it.....and that is how it sat for the past 4 years. Could be reassembled for a complete genset or used for parts. Low hours, but cannot be verified.
