Ray marine SL72 Radar NorthStar 941X GPS Ritchie compass

This is a rare twin screw 40 Personnel Boat / Propulsion is twin Cummins 5.9M diesels coupled to Twin Disc 506A gears. The Cabin has both forward and aft seating. Forward hosts a small galley and head. Aft has seating only. The boat has not run in several years according to the Navy and was winterized and pickled prior to us purchasing the boat. The engines and systems were tagged accordingly. Hours on the the motors dictate 35 to 40 hours total. The vessel is in good shape overall and would make a wonderful overnighiter or cruiser.
