Additional Information Berthing for 4 Does not currently have COI In 1998, it was converted for survey use in anticipation of the upcoming project. All systems were either upgraded or replaced. Some of the major improvements included the replacement of existing main engines with 4 stroke engines, complete interior remodel, replacement of wheel house electronics, and complete rewiring of all systems. In 2010 all machinery was replaced to meet local regulations for EPA tier 2 certifiCATION.
