

Caterpillar 3412 DITA Marine Engine - RTO

PRODUCT DESCRIPTION

It has just over 4400 hours. It was a swing engine that owner had. To the best of what we can find out the top was done on it and the base pan removed for inspection.

It was re installed in a tug and very lightly used. The tug was decommissioned in 2009 that's when it was taken out and kept for a swing engine at one of owner warehouses but not used afterwards.

Shop took a head pan off and one of the inspection plates. It could use a coat of paint outside but looks in good condition inside.
