

# Cummins 40,000 psi powered pressure washer

## PRODUCT DESCRIPTION

It is an amazing machine but owners are not planning to use it anymore.

770 hours. Has not been operated since 2018.

2 guns, 2 bipods that connect the guns and hoses for both guns. No consumables

**Categories:** [Shipyard & Marina Equipment](#)

**Condition** Used

**NLB 40201D Ultra-Clean 40®**  
Ultra-High Pressure Water Jetting System

The NLB Model 40201D WaterJet System combines the power of UHP waterblasting with the dependability of a slow-running plunger pump design that has been proven in countless applications for over 40 years.

With pressures up to 40,000 psi (2,800 bar) and a flow rate of 6.0 gpm (23 lpm), the 40201D has the flexibility to perform a wide variety of water jetting applications, and allows for dual operator capability. Several of most common applications include surface preparation, descaling, coating removal, and cutting. Since the unit's power comes from a slow-running triplex plunger pump, wear and maintenance are minimized. You save money on parts and have more uptime in the field.

**Features include:**

- The slow running plunger pump is built from high-grade stainless steel and provides unprecedented reliability.
- Lightweight and trailer mounted for ease of mobility.
- Pump can be converted to operate at pressures of 10,000 or 20,000 psi.
- On-board air compressor to power multiple accessories.
- A remote accessory manifold includes pressure gauge, rupture disc and by-pass valve.
- Water pressure sensing throttle control monitors operator demand and adjusts output.

The Leader in High-Pressure Water Jet Technology
