Detroit 800kw Diesel Generator

PRODUCT DESCRIPTION

800 Kw, Detroit 16V92TA 600 Volt, premium control panel,
Deepsea 1710 digital control, circuit breaker, muffler 822 Hours since new
open skid machine in a weather enclosure with unused 520 Gallon (2000L)
double walled supplied loose, Dimensions 193”L x 96”wide X 9ft tall with muffler

Update:
Had to exchange the engine and generator due to cylinder leakage. It has been replaced with a 800kw Kohler, 600 volt unit. Also, with the Detroit 16V92TT and a different enclosure with fuel tank, circuit block heater, Kohler Decision-maker 550 analogue/digital .auto start controls, and load tested. The original 16V92TT engine needs to be torn down, hence the replacement with the Kohler machine.

The enclosure has a sub-base double walled fuel UL tank of about 1000 gallons. The unit will be fully serviced and painted before installation into the enclosure.

We will require 2 weeks to complete the machine inside the enclosure.

Categories: Marine Generators
Generator Manufacturer/Brand Detroit
kW Rating 800
Voltage 3 phase - 600 volt
