## 90x30x9 Dock Barge

---

### PRODUCT DESCRIPTION

Dock Barge (90x30x9)

The Dock Barge is an all welded steel, double raked, compartmentalized barge. Barge shell originally constructed of 3/8" steel plate, top, bottom and sides with 5/16" thick steel plate bulkheads. Barge shell is compartmentalized by the placement of three (3) transverse bulkheads and one (1) partial longitudinal bulkhead. Deck fittings consist of two (2) centerline through hull spud wells positioned bow and stern, three (3) x fabricated steel single bitts on quarters, two (2) 30" cast steel keel positioned in range port and starboard side.

Has spuds but no winches.
