

Lugger 6140 Marine Engine

- RTO - 600HP

PRODUCT DESCRIPTION

The previous owner bought it for a parts motor as it was a running take out with an oil pump issue; before storing it he poured mystery oil into the valves and would regularly turn the engine over to make sure she still spun.

Believed to have had around 28,000 hours, but cannot be verified. The data plate is worn beyond readability. Believed to be an AL2.

We just sold the current owners unit out of his vessel and he has this spare available.
