

National Crane - Model N160-39 - 8 Ton

PRODUCT DESCRIPTION

8 Ton
Hydraulic

Owner purchased the crane and was going to install on his workboat.

But USCG requested a boat stability test that he could not afford.

It shipped to him in a 40' container, but will actually fit in a 20'.

Buyer pays for shipping/logistics, we can help.

Before buying in Florida, owner tested crane prior to removal from boom truck.

Everything worked, all functions applied well.
