

Nordic / J.K. Fabrication Model 20-12RB Winches

PRODUCT DESCRIPTION

They were pulled from owners barge in 2023, where they were used as anchor winches.

They only used them once or twice in the time they've owned the barge, and they were new when they were put on there. Since that time, they have been stored. They're both galvanized steel with stainless fittings, and have held up very well so far.
