## Single or Pair CAT 3196 Marine Engines

---

### PRODUCT DESCRIPTION

Approximately 2,000 original hours verified by hour meter.

Pulled from a boat that took water, but the engines did not get wet. Water came up to the mounts, but no further. They are said to not be pretty, but run well.

Also available Twin Disc 5111 Vdrives which were engage in forward and reverse when they last ran the engines.

The exhaust system compliments the V-drives.

**Categories:** [Marine Engines](#), [Marine Gears](#)

**Engine Manufacturer/Brand** CAT

**Engine Model** 3196

**Hours on Equipment** 2000

**Gear Manufacturer** Twin Disc

**Gear Model** 5114 V Drives

**Gear Condition** Running Take Out - RTO

**Additional Information** Known history report:

These are just the way they came out of the boat. I haven't had a chance to detail them out. They both had standing rainwater in it so the starter motors would be new and replaced for sure. I haven't started them yet, but they don't look pretty. There's 2 meters, on there one shows 2000 and the other shows 1000. I imagine one engine was

probably replaced under warranty. That's why there's 1000 hours difference on them, I have no other information from the previous owner.

2/13/25--call w Oliver - he also has a pair that needs to be rebuilt. Would do \$7K per unit bobtail, has 2:1 gears on them, \$10K / unit.

4/17/25--call: Oliver confirmed available. His mechanic has a running video. \$22,500 per unit. \$10K / unit for the gears. Will split. 7/24/25--call w Oliver about these.
