Single CAT 3406E Marine Propulsion 800HP

PRODUCT DESCRIPTION

Bobtail

1997

It has 8,672 hours on the block and 3,835 hours since the major overhaul by a CAT mechanic using CAT parts.
Engines were purchased as running takeouts without known history, so a major overhaul was done.
New raw water pumps installed. The turbocharger was blueprinted a few years ago.
The aftercooler was serviced this season 24. The alternator has been replaced.
Valves were adjusted a couple of years ago.

The reason for selling is repowering with larger engines.
