

Pair CAT 3412 DITTA Marine Engines - RTOs

PRODUCT DESCRIPTION

Per the owner: Engines and gears came out of a 100ft gulf craft that we use sightseeing in the summer and fishing in the spring and fall. They were removed and replaced with the same make and model engine. We removed them in February of 2021. hours are 20-25k. Thats a ball park going off how many trips i ran since we rebuild them. Last time ran was January 2021. Engines are stored on pallets and covered up at the yard. No known issues. Oil pressure and water temp was all good on our steam up to the yard right before pulling engines. Oil sample done when pulled. One is showing wear and could need work, other is fine.

Categories: [Marine Engines](#)

Engine Manufacturer/Brand CAT

Engine Model 3412

HP 1100

Condition RTO

Additional Information Single 195 gear 2.03:1 available
