Engine Manufacturer/Brand CAT

Engine Model 3412

Additional Information The engines originally were 4k hour engines. They didn't need rebuilt other than the fact they took on water in the crank cases and rusted some of the internal components. All the sensors and ECM's got re used. They Did not take on water though.

The engines were build for a larger corporation who doesn't want them anymore, they want to go to a 3512.
