

Pair CAT C32 Marine Propulsion Engines Rebuilt RXB

PRODUCT DESCRIPTION

Arrangement - #239-2350, 239-2351

Both CCW (Counter Clockwise Rotation) Engines

Rated at 1550hp to better sit with the current transmissions, but they can be 1650hp. Could possibly rate them down to 1400HP, but that would need to be confirmed.

Gears available for extra cost:

ZF2060A Transmissions

Categories: [Marine Engines](#)

Engine Manufacturer/Brand CAT

Engine Model C32

HP 1650

Additional Information ● Original hours reported on the engines: Port Engine - 4,492; Stbd Engine - 2,627. ● Engines were inspected by Caterpillar Dealer for another customer and found to have pitting starting in multiple cylinders on each engine. That along with other signs of wear brought Caterpillar to the conclusion that a complete overhaul of each engine was recommended. ● Engines equipped with Derate Software in their ECMs that will correspond to the alarms in the panels. ● Included in the supply of the engine packages are single

station controls and panels from the pilot house, harnesses from pilot house to the engine room, control boxes, and connectors. Complete Overhaul Specifications. ● Overhaul both Main engines back to CAT Standard Zero hours. ● Both engines were torn down including having blocks inspected to verify if any pitting in the block. If any pitting found, blocks were machined and crank, cams all honed. ● Both units will be ran after completion of Overhauls to confirm both are performing to CAT standards.
