Categories: Marine Engines
Cooling Method Heat Exchanger
Engine Manufacturer/Brand Cummins
Engine Model VTA903s
HP 450
Condition RTO
Additional Information Additional Notes: Port engine - rebuilt several years back by reputable rebuilder known for his experience working for Cummins and now semi retired just helps a few boat owners here and there.. complete rebuild at that time.. They figure about 1500 hours on that rebuild since.. Starboard engine - Was rebuilt in carribean - full inframe rebuild at cost of over $20,000 - Owner brought boat back from Turks and Caicos up to North Carolina and then parked it with very occasional use. They believe no more than 200 hours on that unit total since rebuilt. Realistically more like 100 hours, but they are trying to be overly fair. Next season decided to go ahead with a repower to more HP and newer engines. Shop who did repower, currently are storing the engines and owners of the units.. They will pull them out and run them prior to leaving as well once deposit has been paid..
