

Pair of CAT 3208TA 375HP Marine

PRODUCT DESCRIPTION

Caterpillar 3208

These are currently in a commercial vessel meaning the oil changes, fuel filters, zincs, etc are done often to ensure reliability. Turbo after cooled models making 375hp, they both run well, port has approximately 5k hours and Stbd has approximately 2k hours since reman. They do not come with gears (transmissions) however both wiring harnesses and new gauge sets seen in pics are included. The video is from 9/9/24 where I did a cold start. It will take 3 to 4 days to remove from vessel.
