

Pair of Luggers 6140 AL2 Marine Engines

PRODUCT DESCRIPTION

Luggers 6140AL2 Marine Engines

The two motors are configured to 700 hp. One motor has approximately 2,200 hours since major rebuild, and the other 1,200 hours since overhaul. There is a spare long block being stored in a climate controlled environment and is configured to 700hp.

These motors can be configured to 600hp or 700hp, depending on the injection pump, injectors, and turbos. 700hp has extra coolers.

Also available are 600hp and 700hp injection pumps and injectors in both hps. There is also a 700hp turbo.

Lastly, there is a good amount of cooling parts, but not sure if it is all configured for 600hp or 700hp.
