Gears Output Straight

Ratio 3:1

Condition Surplus

Marine Propulsion Systems

ZF 2270
Vertical offset, direct or remote mount marine transmission.

Description

- 3 shaft, gearbox reduction transmission with hydraulic clutch mounted on the input shaft and another one mounted on the output shaft, input drive on opposite side to output drive.
- Reverse-reversing RPT version also available.
- Fully service tested, reliable and easy to install.
- Suitable for high performance applications in luxury motor-yachts, sport-fishers, express-cruisers etc.
- Compatible with all types of engines.
- The ZF 2270 series is not suitable for Surface Drive applications.

Features

- Lightweight and robust aluminum alloy casting (sea water resistant).
- Case hardened and precision ground gear teeth for long life and smooth running.
- Output shaft (final bearing designed) to take maximum propeller thrust again and ahead.
- Smooth and reliable hydraulic clutch with electric activation.
- Emergency "fail home" capability.

Options

- Custom-matched torsional coupling.
- Mounting brackets.
- Propeller shaft flange and coupling bell seals.
- SAE shaft housing.
- Low PTO's.
- Remote-control actuation with lever for attachment of push-pull cable.
- Remounting kit.
- Cooling device.
- Hoisting frame.
