

Rowe Hydraulic Winch - Owner believes 5,000lb line pull

PRODUCT DESCRIPTION

It is a Rowe and it has a huge drum. It can hold 1200 ft of 1 3/8 wire. It is hydraulic and works well although the ring gear seems worn. It seems to have at least 5,000 pounds of line pull. Owner used it for pulling up surge gear on their barge and now it is surplus to their needs. They have 1 1/2 stud link, and 3/4 di loc chain they could pedal as well.
