

Single Cummins 6BT RTO

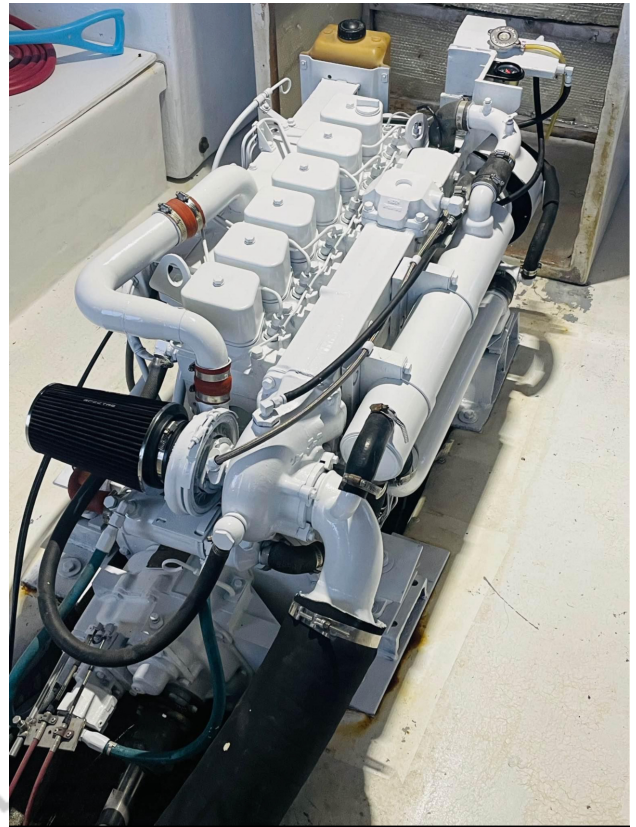

PRODUCT DESCRIPTION

Cummins 6BT marine engine, rated at 210 horsepower, equipped with a heat exchanger cooling system and having logged 6,000 operating hours. This engine is being removed from a 32-foot Jefferson vessel, as it is being replaced by a Cummins engine with a power output of 370 horsepower.

The engine is free of leaks and is being offered with harness and gauge; however, please note that it does not include a gear.
