# Single Cummins QSB Marine Propulsion w 480HP

---

## PRODUCT DESCRIPTION

2017 w 410 hours Removed from Navy vessel - Running Take out. Best practice would be to have heat exchangers and aftercoolers gone through, along with any other standard servicing before install. Currently set up for 24V, but can be converted to 12V for a cost. No panel, no harness, no elbow or front munts.
