

Surplus Ultra Jet 525 units - New Unused

PRODUCT DESCRIPTION

Description

The MJP Ultrajet 525 with a 525mm (20.7") diameter impeller provides higher thrust per horsepower and can be used with engines up to 1100 kW.

The hydrodynamically designed MJP Ultrajet 525 incorporates an efficient and robust axial flow pump utilising a range of five bladed impellers to match various engine and gearbox combinations and is the culmination of over 45 years of research, development and practical experience. MJP Ultrajet drives have been developed for commercial, pleasure and military craft.

The MJP Ultrajet 525 can be supplied with a full range of electro-hydraulic steering and reverse control systems including multi-station joystick control systems if required.
